*Preserving  
fertility before  
your treatment*

## Receiving a medical diagnosis like cancer can be overwhelming

For females of child bearing age, future fertility may be of concern. Fertility preservation treatment can help. Ferring Pharmaceuticals has a solution for providing the necessary medications through its Heartbeat program, available from AllianceRx Walgreens Pharmacy.

## One less expense

A donation from Ferring Pharmaceuticals will allow you to receive select fertility products for your fertility preservation treatment at no cost. Simply have your doctor send AllianceRx Walgreens Pharmacy your prescription and we will take care of the rest.

## To enroll in the Heartbeat program, have your doctor do one of the following:

- Fax enrollment form to **888-347-3417**
- E-prescribe by searching for pharmacy store # 16287
- Doctor or nurse must note "Heartbeat program patient" on electronic transfer
- Heartbeat Fax Form is available at <https://www.alliancerxwp.com/business/providers/referral-forms>

## To qualify

- No financial requirements\*
- New diagnosis of cancer within the past 12 months
- Age 43 years or younger (if above 40 years, AMH should be greater than 0.5)\*\*
- Patient should not have received any gonadotoxic treatment prior to starting a fertility preservation cycle
- Patient will be given a maximum of 2 fertility preservation cycles. The cycles will have to be done prior to getting gonadotoxic treatment
- Oncologist and reproductive endocrinologist determine that fertility preservation treatment is medically appropriate
- Additional medical information may be required prior to approval
