

## Walgreens/AARP Team Members In their Words

Team member 1 : We get a story everyday about someone who really really appreciates the fact that we re here and it s a nice thing were doing. We hear that over and over everyday.

(Over Music)

Team member 2: Before he left he turned to me and said God bless you and he told me he hadn t been to a doctor in his whole life and he never could have afforded it.

Team member 3: I became diabetic before to work so I knew what was going on through his mind when I told him that he might have diabetes. His glucose ratings were very high and he was very grateful and it runs in his family. It was good to at least say hey, take care of yourself.

Team member 4: One day, I was reading the screening results to this lady and it showed that her sugar levels were really high (in Spanish). The lady got really worried so we referred her to a doctor so she could continue monitoring her glucose levels. A couple of days later, the same lady came to our event at the Walgreens store in Loiza (in Spanish). And as soon as she saw me she gave me a big hug and she thanked me for making her health conscious.

Team Member 5: All the tears, all the thank-yous - was something I never expected.
