

A little flavor to brighten your day

Being sick can be a real bummer for kiddos. We get it. That's why we offer FLAVORx. Letting kids choose the taste of their medicine when they're under the weather can be a real bright spot during an otherwise difficult time. We offer the following great-tasting flavors, which can be added to most liquid medications for just a few dollars:

					
Awesome Apple	Banana Bonanza	Blastin' Bubblegum	Cheeky Cherry	Giggly Grape	Giddy Grapeade
					
Lucky Lemon	Mighty Mango	Sassy Sour Apple	Rockin' Raspberry	Smashin' Strawberry	Wacky Watermelon

All FLAVORx flavors are sugar-free, dye-free, and allergen-free. They are also tested to make sure they don't change how the medicine works, only how it tastes. Your Walgreens pharmacist will let you know which flavors work best, but if you'd like to get a jump start on selecting a favorite flavor, here are some of the top options for the most commonly dispensed medications:

<p>Amoxicillin</p> 	<p>Augmentin® / Amox/Clav</p> 	<p>Zithromax® / Azithromycin</p> 
<p>Omnicef® / Cefdinir</p> 	<p>Keflex® / Cephalexin</p> 	<p>Cleocin® / Clindamycin</p> 
<p>Prelone® / Prednisolone</p> 	<p>Bactrim® / SMZ-TMP</p> 	<p>Tamiflu®</p>
